About

IADS is a U.S. Army funded project originally developed to eliminate the need for paper technical manuals in the field through creating and distributing technical manuals in electronic format.

The team behind IADS has been developing IETM software since 1989. What originated as a "paperless" initiative has become a full-featured application with many features users are familiar with from other programs including navigation history and search capabilities.

IADS 4 is a brand-new IETM solution designed from the ground up to provide a modern, user-friendly, effective package.

We think you're going to love the NEW IADS!

Features

GOTS product
Government off-the-shelf IETM solution. Provided at no cost.

Multiple DTDs supported
Currently MIL-STD-40051 & S1000D.

Multiple-configuration systems
Support for systems that contain multiple configurations in a single IETM.

Navigation history
Maintains a list of visited documents for quick access.

Bookmarks and notes
Allows users to save locations and extra information (including critical safety messages).

RPSTL
Repair parts and special tools list — including a shopping cart and parts requests capability.

What's New

Modern interface
New look-and-feel designed to be easy-to-use, functional, and efficient.

Render directly from XML
Import XML without preprocessing. Make changes in your data and see the result immediately.

Multiple tabs
Open multiple documents at once using the "Open in New Tab" option.

Integrated multimedia
The graphics split-screen now plays videos & flash content without launching another program.

Simplified search
Searching is now simpler and more powerful. Just enter what you're looking for and IADS will find it.

Enhanced printing
All figures are now printed inline with other content.

Export to PDF
Export documents to PDF files with the click of a button.

Automatic software updates
IADS will always be up-to-date with automatic updates. (Requires Internet access)
